

# Spritzgerätereiniger

Cleaner for spraying devices

---

## General description

Type of material: Cleaning agent

Applications: For the cleaning of spraying devices used to apply water-soluble emulsions and other sprayable materials.

Product properties: Simple to use, thoroughly dissolves emulsion and paint residues; significantly improves subsequent spraying performance.

Please note that thorough cleaning is essential between spraying operations if the same device is to be used to apply anionic and cationic emulsions that are incompatible. Although this cleaner will help remove emulsion and paint residues, it is not suitable for use for the kind of thorough cleaning required in such cases.

Packaging sizes: 500 ml

---

## Technical data

Basis: Water/solvent with additives

Density: Approx. 1000 g/cm<sup>3</sup>

Application temperature: Do not use at temperatures below 0°C.

Yield: Should be sufficient for roughly seven cleaning operations.

---

## Method of application

Application: Add two caps of spray device cleaner (approx. 70 ml) to each litre of water. Set the device to circulation and rinse with the mixture. Ensure that the spray gun and hose are also thoroughly rinsed. Check that the gun filter is clean. Repeat the procedure depending on the level of soiling. Finally rinse with clean water.

---

## Marking

Please take note of our updated Safety Data Sheet available online at [www.jansen.de](http://www.jansen.de) / [www.jansen-lacke.at](http://www.jansen-lacke.at)

---

This technical information has been compiled based on current technological standards. However, we can provide no guarantee for the general validity of individual recommendations since actual application and processing are not under our control and the variable nature of substrates mean that specific technical and practical factors will determine appropriate methods of application in each case. These recommendations do not absolve the customer from their responsibility to test the supplier's products for suitability for the intended use. The "General Delivery and Payment Conditions of the Paint Industry" as per recommendation approved by the Federal Cartel Office on 11 July 2003 apply. The release of this datasheet invalidates all previous datasheets for this product.
